CLERMONT SHOW
STABLING CONDITIONS

Booking for stalls can be made by sending a booking fee of $6.00 (Inc GST) per stall to: The Secretary, PO Box 82, Clermont Qld 4721. Allocation is in order of receipt, as a limited number of stalls are available. The following rules apply:

1. All Stables ***must*** be fully paid for at the time of booking.
2. No Stable will be held for anyone, local or otherwise, stables will be allocated on a first come basis i.e. if you pay and there is a stable available then a stable will be allocated to you.
3. Local competitors requiring stables must book and pay for stables as per all other competitors. ***No Exceptions.***
4. Fully refundable cancellations can be made up until 1 week prior to the show, i.e. Sunday 20th May 2018. Any cancelled stables will be allocated in order of receipt of booking.
5. After the 20th May competitors will be responsible for "selling" their stalls if no longer needed.

Please be thoughtful of your neighbours when camping – space is limited and the Show Committee would appreciate that the camping area is used efficiently to ensure all competitors have access to a camping site. Please be honest and declare the horses not in stables and the camping fees!

Camping fees of $11.00 (Inc GST) per site and Stall fees must be paid with bookings of Stalls before nominations will be accepted. NO MONEY - NO STALLS.

To help eliminate the risk of injury caused by electrical shock, participants are asked to ensure that all electrical leads associated with tents, camps, etc are protected in accordance with AS3002-85.

2.2.1.2. ***Overhead Wiring*** Overhead wiring for a temporary site installation shall consist of cables other than bare conductors. The clearance of these cables from the ground or elevated area shall be as follows:

(a) Where concessions are located 4.5 m (b) Where used for vehicular access, or roadways 5.5 m

These clearances shall include the connection between the overhead and circuit wiring.

NOTE: See also clause 2.1.1.2.

2.2.1.3. ***Underground Wiring*** Underground wiring for a temporary site installation shall consist of cables buried either direct in the ground or in appropriate underground enclosures.

The minimum depth of laying shall be -

(a) for areas subject to vehicular traffic 150 mm (b) for other areas 75 mm
